

Supported decision making strategies

Consider the following to better support decision-making:

- Consider mood and lucidity - should you arrange a different time?
- Can you explain the decision and risks differently?
- Is it possible to give them time to consider the decision?
- Can you involve a support person to assist them to make an informed decision?
- Can they express their wishes about the decision?
- Is the difficulty more a matter of communication method?
- Can you support a different communication method?
